

A Message from Sherry Mehl, BAR Chief

Keeping Shops and Technicians Honest Through Proactive Education and Efficient Enforcement

In these tough economic times, the pressure on some shops to maximize sales and improve margins can be intense.

To promote their business, many shops will engage in perfectly appropriate practices, such as offering coupons, promoting specials, and using direct mailers.

Unfortunately, some shops engage in unscrupulous and illegal practices. For Smog Check stations, this can involve clean-piping. For an auto body shop, it may mean substituting an aftermarket part, even though the customer or insurer paid for an OEM part. For a general automotive repair shop, it can mean up-selling services or parts.

The consequences of improper and illegal actions have been well documented in this newsletter. BAR recently concluded a major consumer fraud case against a franchisee of Midas International. BAR also conducted major undercover operations against Smog Check stations and technicians in Los Angeles and Santa Clara counties that resulted in several arrests.

Smog Check Licensing Restructure Update

Plans to update licensing structure continue to move forward

The success of any business depends, in part, on offering goods or services that are relevant to the market.

To some extent, the same principal applies to regulatory agencies like the Bureau of Automotive Repair (BAR). The success of BAR depends, in part, on having a licensing system that is relevant and responsive to the marketplace it is tasked with regulating.

With this in mind, BAR retained the services of two independent consultants to assess the regulatory structure for licensing individuals and stations in the Smog Check marketplace. The consultants' evaluations built upon a formal assessment conducted by BAR and the Department of Consumer Affairs. Part of this evaluation involved soliciting input from more than 5,000 Smog Check station owners, technicians, and educators.

Keeping Shops and Technicians Honest *(continued from cover)*

BAR makes every effort to ensure that licensees have the information necessary to comply with the law to avoid these situations. The Education First Program provides licensees an excellent one-on-one opportunity to learn about BAR and the law. Write It Right is essential reading for every licensee. The Smog Check Manual, which was recently revised, provides valuable information to technicians and stations.

Of course, even the most comprehensive educational effort means nothing to a licensee determined to break the law. That's where BAR's enforcement program comes in. On any given day, BAR has hundreds of highly-trained professionals investigating complaints, auditing shops, and inspecting facilities to ensure compliance with the law.

BAR also has world-class engineers who constantly review and analyze data to determine which stations and technicians may not be playing by the rules. They also employ the latest technology to help ensure the integrity of the industry.

BAR has been around for a long time. If there is one thing we've learned over the years, it is that unscrupulous operators will often work overtime to evade detection by BAR. BAR, in turn, must work even harder to stay one step ahead. Eventually, we will find licensees who fail to comply with the law and when we do, we take appropriate action as necessary. **B!R**

Smog Check Licensing Restructure *(continued from cover)*

The consultants completed their assessment in 2009. They found that the Smog Check Program's licensing structure is outmoded and must be restructured to reflect today's marketplace. One consultant even went so far as to say that BAR's current licensing strategy might be best described as one size fits all, as it treats all technicians the same regardless of the job they perform or the level of knowledge, skill, and ability they already possess. In many cases, technicians are required to be licensed beyond the scope of the work that they are allowed to perform. Additionally, other highly skilled and proficient technicians are deterred from becoming licensed. These proficient technicians often work in shops that specialize in the repair of a particular brand of vehicle, including independents and new car dealers.

Under the proposed restructure, stations and technicians will be able to choose a license combination that best fits their business needs and career goals. For example, a Test-Only Smog Check station may opt to hire individuals who possess a license to test but not repair vehicles that fail an inspection. Conversely, an individual interested in testing and repairing vehicles that fail an inspection will have a specialized license to do just that.

Existing Test-Only and Test-and-Repair station licenses will not be affected by this proposal. All existing Test-and-

Repair licenses for technicians will remain unchanged, although the distinction between Basic and Enhanced program areas will be abolished. In addition, the Intern License will be eliminated.

Ultimately, this flexible licensing structure will help improve the effectiveness of the Smog Check Program. Stations will be able to choose the option that best meets their needs and the technician's qualifications will be specific to the services for which they are licensed to provide. Licensing paths will be available for highly skilled and proficient technicians as well as for those with less experience. In both cases, qualifications, including training, will meet the needs of the job.

These are significant changes that will require a change to regulations. The regulatory update is being pursued in consultation with industry and the public. To date, BAR has conducted several public workshops and will conduct several more in the upcoming months. Stations, technicians, and educators are invited to share their views and ideas.

To learn more about this proposed restructure and upcoming public workshops, please visit www.smogcheck.ca.gov under the Industry tab. **B!R**

Consumer Assistance Program Set to Expand

Off-cycle vehicles now eligible for retirement; vouchers to be offered to some consumers

Big changes are coming to the Consumer Assistance Program (CAP). And those changes will benefit almost anyone who owns a car, truck, or SUV.

Beginning in early 2011, the Bureau of Automotive Repair (BAR), in conjunction with the California Air Resources Board (ARB), will expand the vehicle retirement option of CAP to include off-cycle vehicles. The owners of these vehicles will need to meet most of the same eligibility requirements as on-cycle vehicles, and consumers will receive \$1,000 if they qualify. Unlike on-cycle vehicles, owners of off-cycle vehicles will not need to fail a Smog Check inspection in order to qualify.

In conjunction with the off-cycle vehicle retirement program, the ARB will be working with the San Joaquin Air Pollution Control District and the South Coast Air Quality Management District to implement a voucher program. The districts will be responsible for targeting owners who retire their off-cycle vehicles through CAP to participate in the voucher program.

Eligible consumers will receive either \$2,000 or \$2,500 toward the purchase of a newer vehicle. Consumers will be able to redeem their vouchers at participating car dealerships. Consumers can also use the vouchers to purchase transit passes from participating transportation districts.

"Expanding the vehicle retirement program is a really big deal," notes Tonya Blood, Program Manager for CAP. "We at CAP receive many applications from consumers who want to retire their vehicles but do not necessarily meet the eligibility requirements for CAP as things now stand."

"This change in CAP to include off-cycle vehicles goes a long way to helping the State achieve its vehicle emissions reduction goals. It also gives consumers an avenue for disposing of their high polluting vehicles," notes Chief Sherry Mehl.

Look for an expanded CAP and new application this December. Gold Shield and Test-Only stations will receive a supply of the new applications shortly before implementation. **BAR**

SMOG CHECK STATION PERFORMANCE

CAP FACTS

A statistical look at the Consumer Assistance Program (CAP)*

January through March 2010	
Vehicles Retired	5,546
Vehicles Repaired	13,923
Applications Processed at BAR Field Offices **	6,965
Emissions Reductions (average tons per year)	
Hydrocarbons	217.6
Oxides of Nitrogen	215.0
Carbon Monoxide ***	37.0
Disbursements	
Vehicle Retirement	\$5,568,850
Vehicle Repairs	\$5,705,989
TOTAL Disbursed	\$11,274,839

* This analysis considers a vehicle repaired or retired upon BAR approval of a station or dismantler invoice for payment, rather than the actual date the vehicle is repaired or retired.

** This figure reflects the total number of CAP applications received and processed on the same day at BAR field offices. Most applications were processed while the consumer waited.

*** Carbon Monoxide has been divided by 56 to reflect ARB estimates of the reactivity of CO relative to other hydrocarbon compounds participating in the formation of ozone.

Clarifying Registration Requirements with BAR

From time to time, the Bureau of Automotive Repair (BAR) receives inquiries from business owners about when they should register with the Bureau. In some cases, the requirements for licensure are obvious. In other cases, there may be questions. To help answer some of these questions, the following table identifies just some of the

automotive-related repair work that may or may not require licensure with BAR. The list is not intended to be all-inclusive.

If you have questions about whether you or your business should register with BAR, please contact your local field office or the Licensing Unit at 916.255.3145.

If I only...	Must I register?	Code Section
Repair vehicles without compensation	If you are repairing vehicles without compensation, you are not required to be registered as an Automotive Repair Dealer (ARD).	Business and Professions Code 9880.1(a)
Perform oil changes	If you only perform oil changes, you are excluded from being registered as an ARD.	Business and Professions Code 9880.1(e)
Install car stereos and/or alarms	Installing car stereos and/or alarms are generally exempt from the requirements of registration with BAR as long as the proprietor does not change or adjust the mechanics of the vehicle. However, individuals engaged in installing, repairing, servicing, or maintaining stereos and/or alarms on motor vehicles must register with the Bureau of Electronic and Appliance Repair and Home Furnishings & Thermal Installation. They may be reached at 916.574.2067.	Business and Professions Code 9880.2(c)
Install windshields	Installation of windshields constitutes a repair to the vehicle and requires registration as an ARD.	Business and Professions Code 9880.1(e)
Repair chips on windshields	If you are only performing chip repairs, you are still required to be registered because glass is a structural component of a vehicle and requires mechanical expertise.	Business and Professions Code 9880.1(e)
Install interlock devices	Installing an interlock device constitutes a modification of the electrical components of a vehicle and requires registration as an ARD.	California Code of Regulations 3363.3
Install car ignitions	Installation of vehicle ignition requires registration as an ARD.	Business and Professions Code 9880.1(a)
Own a gas station	If you own a gas station and are not repairing or diagnosing malfunctions of vehicles, you are not required to have an ARD registration.	Business and Professions Code 9884
Upholster vehicle interiors	If you do not change or modify the mechanics of the interior, you are not required to register as an ARD. However, if upholstery work is performed on any part of a seat/door motor or seat that contains airbags, you are required to have an ARD registration.	Business and Professions Code 9884

BAR Auto Body Inspection Program Going Strong

One of the most popular and useful services offered to consumers by the Bureau of Automotive Repair (BAR) is the Auto Body Inspection Program. This program is designed to help consumers who feel that the auto body repairs performed on their vehicle did not meet their expectations or were not what they paid for.

The consumer response to this service has been overwhelmingly positive. In 2009, BAR received 240 requests from consumers to inspect their vehicles. Of those requests, 194 inspections were completed. As a result of these inspections, 63 vehicles had issues with the work performed. Problems identified by BAR representatives ranged from minor quality and fit and finish issues to more significant problems.

“The Auto Body Inspection Program is a particularly valuable service to consumers,” notes BAR Chief Sherry Mehl. “I encourage shops that feel a customer may not have received the services they paid for from another shop to have the customer call BAR.”

To learn more about this service or to schedule a free auto body inspection, call 916.255.4391. A BAR representative will then schedule an inspection. **B:R**

BAR-2012 EIS

Emissions Inspection System

Analyzer Update

The Bureau of Automotive Repair (BAR) continues to move forward in the development and procurement of a replacement for the BAR-97 analyzer. The new analyzer, called BAR-2012, is scheduled for implementation sometime in 2012. To learn more about this project, please visit www.smogcheck.ca.gov. **B:R**

Quarterly Bureau Advisory Group Meetings

Do you want to know what's going on at the Bureau of Automotive Repair (BAR)? Do you have ideas that you'd like to share with BAR's chief? BAR holds quarterly meetings that are open to the public. These meetings are a great opportunity to meet key staff from the Bureau, industry representatives, and consumer advocates. To learn more about meeting dates and times and to obtain an agenda, visit us online at www.smogcheck.ca.gov. **B:R**

Green Station Recognition Program Continues to Grow

Program is particularly popular with consumers

Since its inception, the Green Station Recognition Program has proven to be quite popular with stations. The 27 shops that have signed on so far say that the program has been a great tool to distinguish themselves from their competitors and is a useful marketing tool.

The Green Station Recognition Program, which is administered by the Department of Toxic Substances Control, is designed to recognize businesses that engage in environmentally friendly practices as part of their normal business. Participation in the program is voluntary and there are no fees to participate.

The consumer response to the program has been extremely positive, as many make a point of selecting a shop based on its green certification.

Sean Leland patronizes Arreguin Performance in Ukiah not just because of the service he gets, but because it also happens to be a green station. "I absolutely support businesses that take care of the environment," Leland says. "I never see oil or puddles of fluids on the ground when I visit Arreguin Performance, so I know they don't seep into the ground and harm the environment," he adds.

The green station certification also serves as an important marketing tool for shops.

Marvin-Donald Cruse says the green certification was a key fact that helped him to select The Dr. Independent Service as his primary repair shop. "There are many shops out there that can fix a car," notes Cruse. "The Dr. Independent Service was the only shop in my area that had the designation, so it made my decision to go with them that much easier."

Marc Kennedy, owner of The Dr. Independent Service, notes that doing little things, like replacing styrofoam cups with glass cups for coffee is just one of the things customers notice when they come into his shop. Other things, like using a car wash clarifier to separate oils and solids and working with a company to dispose of the empty aerosol cans are actions that may not be readily apparent to his customers, but they have a big impact on the environment.

If you are interested in learning more about the Green Station Recognition Program, please visit www.smogcheck.ca.gov/greenstationprogram. **B:R**

Becoming Green Recognized is Easy

If you're interested in your facility becoming a Green Station you can download an application from the BAR Web site at www.smogcheck.ca.gov and click on the "Green Station Program" link.

With your completed application, include the DTSC Model Shop Pollution Prevention Checklist, a copy of your most recent hazardous materials inspection report and air district inspection report, your DTSC "Summarize Your Environmental Benefits" form, the P2 Opportunities Checklist, and mail to the address on the application. If approved, DTSC will notify BAR and you will receive your Green Station certificate to post at your station.

Quick Tip

Get Your ARSCN Electronically

What's the quickest way to get your edition of the *Automotive Repair and Smog Check News*? Electronically, of course! To get your electronic edition of the ARSCN, call 916.255.4300 or e-mail us at BAR_admin@dca.ca.gov.

Legislation Aims to Improve Smog Check Program

The California Air Resources Board (ARB) and the Bureau of Automotive Repair (BAR) are jointly sponsoring legislation that is projected to save consumers money, save time, and provide greater air quality benefits from the State's Smog Check Program.

Addressing challenges raised by a recent analysis of the Smog Check Program, Assemblymember Mike Eng (D-Monterey Park) introduced AB 2289 that will improve service to more than 70 percent of vehicles in California subject to the program. The bill also directs older, high-emitting vehicles to the highest performing stations.

"The Smog Check Program is one of the most important air quality programs that we have to meet State and Federal air quality standards," stated Assembly Member Mike Eng. "AB 2289 is designed to improve the program in reducing pollution through the use of new technologies that provide considerable time and cost savings to consumers while at the same time improving consumer protections by adopting more stringent fine structures to respond to stations and technicians that perform improper and incomplete inspections."

"If signed, this bill will allow a major upgrade in the technologies used to test vehicle emissions," said BAR Chief Sherry Mehl. "It will result in cleaner air and has the potential to reduce the cost of a Smog Check for many consumers, as well as reduce the time spent by consumers getting their vehicles inspected."

"This new and improved program will have the same result as taking 800,000 old cars off the road, also resulting in a more cost effective program for California motorists," said ARB Chairman Mary D. Nichols. "This bill will add additional improvements to one of our most effective programs in our fight for clean air, capturing up to 70 tons per day of smog-forming emissions."

One way the program would reduce costs is by taking advantage of on-board diagnostic (OBD) technology installed in all new vehicles since 1996. The program will now take better advantage of OBD technology by eliminating tailpipe testing and instead using the vehicle's own emissions monitoring system. This system has saved consumers time and money in 22 other states.

The recent review of the Smog Check Program revealed that 19 percent of vehicles that initially passed testing failed subsequent roadside tests within a short period of time. The audit can be found at www.arb.ca.gov/msprog/smogcheck/smogcheck.htm.

In response to these findings, Assemblymember Eng designed legislation that includes the following:

- > Authorize the use of On-Board Diagnostic II testing to expedite the process;
- > Test vehicles known to release large amounts of pollution at stations with the highest performance ratings;
- > Impose a stricter fines structure for improper inspections;
- > Permit the State to contract with the private sector to manage franchise-like networks of independently owned Smog Check stations;
- > Mandate an annual evaluation of station performance using roadside tests; and
- > Encourage community colleges and other training institutions to develop technician-training programs. **B:R**

Career Opportunities at BAR

BAR is continually recruiting to fill a variety of entry-level, journey, and management positions throughout the State. Vacancies exist for everything from Program Representatives, who are responsible for enforcing the laws that protect consumers, to Air Quality Engineers, who help develop strategies for improving California's air quality.

The first step for starting a career is to take an examination. BAR now offers continuous examinations online 24/7. Upon completion of the exam, candidates receive their scores immediately. Candidates who score well may then be contacted for a hiring interview.

For information on examinations and career opportunities at BAR, please visit us online at www.dca.ca.gov and click the "Careers at BAR" link. **BAR**

BAR is continually recruiting to fill positions throughout the State.

Write it Right is Getting a Makeover

Write it Right is an important resource to help ensure compliance with California laws and regulations in the automotive repair and Smog Check marketplace. Currently, there are three *Write it Right* publications. In order to improve the convenience to stations and technicians, BAR will soon be combining the original *Write it Right*, *Write it Right for Smog*, and *Write it Right for Auto Body* into one publication covering all three subjects. Current versions of these three publications are available at www.bar.ca.gov under the publications tab. **BAR**

Help Your Business and Your Customers

Report Unlicensed Activity

Do you suspect a shop or competitor engaged in repairing vehicles is not registered with the Bureau of Automotive Repair (BAR)? Then let us know!

It is against the law for individuals to engage in the repair of motor vehicles for compensation unless they have a valid registration. BAR takes this issue very seriously because unlicensed businesses create an unfair advantage and can harm the consumer.

If your ARD registration has expired, you must renew it or immediately cease performing automotive repairs.

BAR encourages anyone with knowledge of businesses that are operating illegally to let us know. All sources will remain anonymous.

Send your tips to BAR via e-mail to BAReditor@dca.ca.gov or by mail to:

**Quarterly Bureau Advisory
Group Meetings**

Do you want to know what's going on at the Bureau of Automotive Repair (BAR)? Do you have ideas that you'd like to share with BAR's chief? BAR holds quarterly meetings that are open to the public. These meetings are a great opportunity to meet key staff from the Bureau, industry representatives, and consumer advocates. To learn more about meeting dates and times and to obtain an agenda, visit us online at www.smogcheck.ca.gov. **BAR**
